SUMMARY OF SKILLS AND QUALIFICATIONS

Tools & Platforms: Microsoft Fabric, Power BI, Qlik Sense, Git, GitHub, Azure DevOps, Jira, Anaconda, Google Workspace, CRM, Business Central, Windows, macOS, Linux, Docker, Agile/Scrum, Unit Testing, CI/CD

Programming: Python (Pandas, NumPy, Scikit-learn, Jupyter Notebook), Java, JavaScript, TypeScript, React, Node.js, Express.js, SQL, Google Apps Script, HTML/CSS, C#, C

Data Engineering & ML: ETL Pipelines, Data Transformation, Data Migration, Workflow Automation, Data Modeling, Data Warehousing, PyTorch, Scikit-learn, Model Training, Hyperparameter Tuning, Feature Engineering

Data Analytics: Dashboard Development, DAX, KPI Reporting, Data Visualization, Dataflows, Pipeline Orchestration, Workflow Automation, SaaS Analytics Solutions, AI-Assisted Automation, Cloud Analytics, Azure Services

Languages & Certifications: English, French, Arabic | Microsoft AZ-900, SC-900, AI-900

EDUCATION

Concordia University

Bachelor of Computer Science (Co-op)

Montreal, QC

2023 – 2026

WORK EXPERIENCE

Data Engineering Intern & Analytics Consultant

VFFICE

Montreal, QC

2025 – Present

- Designed and deployed **data pipelines** and transformation workflows using **Microsoft Fabric** to centralize and process business data
- Developed interactive **Power BI reports** and KPI reporting solutions to support data-driven decision-making
- Built **data models**, DAX measures, and automated reporting workflows to improve analytics accuracy
- Performed **data migration, cleaning, and integration** across ERP, CRM, and cloud-based business systems
- Integrated **AI-assisted automation workflows** to streamline repetitive operational and analytics processes
- Collaborated with stakeholders to deliver scalable **business intelligence and SaaS analytics solutions** within the Microsoft ecosystem
- Technical Skills:** Microsoft Fabric, Power BI, DAX, ETL, Data Modeling, Power Query, CRM/ERP Integration, Azure DevOps, Automation

Fullstack Software Development Intern

AIRBUS

Mirabel, QC

Sept 2024 – Aug 2025

- Reduced budgetary activity processing time by **240%** for section managers in the budget department
- Decreased by **32%** emergency requests from external departments for the operations department
- Saved **2 hours per week** in planning activities for the airworthiness department
- Lowered planning time by **15%** while improving overall **productivity** for the development department
- Improved **operational efficiency** for over **170 engineers** through the design and implementation of **software tools** using **Google Apps Script** and **Qlik Sense**
- Collaborated with **multidisciplinary teams** in an **Agile environment** to automate processes and develop visualizations supporting decision-making for the **A220 program**
- Technical Skills:** TypeScript, Qlik Sense, Jira, GitHub, Confluence, Clasp

PROJECTS

Flight Price Prediction System | *Python, Flask, Selenium, Hugging Face, SQL*

2025

- Built an end-to-end **ML pipeline** to predict optimal flight booking times using real-time pricing data
- Integrated the **Amadeus API**, Selenium scraping workflows, and automated price-drop notification systems

Kaggle Image Classification Competition | *PyTorch, Scikit-learn*

2025

- Developed **PyTorch** image classification models trained on **115K+ samples** across 50 object categories
- Implemented custom training loops, hyperparameter tuning, normalization, and feature scaling to optimize model performance

Database Management System | *Python, SQL, DBever*

2024

- Designed and optimized a **relational database architecture** using **normalization techniques** to improve **data integrity**
- Developed a **Python-based interface** supporting **SQL queries**, CRUD operations, and structured data management
